

IMCC is a small trade association that represents Private Cable Operators. We have an interest in NPRM 04-143 issued by the Wireless Technology Bureau. Reply Comments were due on September 7, 2004. I believed our Replies were submitted in a timely fashion, but discovered this morning that they were held in my computer's outbox and did not get to the FCC until 4:30 A.M. on September 8. It is requested that the Commission consider our filing as timely. Your attention and assistance is appreciated. Willlm J. Burhop
